CATC History

In 1949, the Vilseck Post was placed under the command of Seventh Army and became the Seventh Army Tank Training Center. Even though troop billeting and classrooms were primarily located near Vilseck, the Tank Training Center also operated special tank ranges in the Grafenwoehr area. Then, in February 1958, the Tank Training Center was re-designated as the Seventh Army Training Center, with headquarters at Vilseck. The entire Grafenwoehr reservation, which included the Grafenwoehr and Vilseck Sub-Posts, became one training center. In 1959, a newly remodeled Grafenwoehr Post became the headquarters of the Seventh Army Training Center. With the re-establishment of Grafenwoehr as the headquarters of the new Seventh Army Training Center, a number of other changes also took place. The area near Vilseck became the Seventh Army Combined Arms School, and at the same time, the Hohenfels Training Area, about 41 miles southwest of Grafenwoehr, with 40,000 acres, was assigned to the new Training Center. Thus, the Seventh Army Training Center became the largest training complex in Western Germany. The year 1970 saw still another move toward combining the training facilities of the U.S. Soldier in Europe under one major headquarters. Kimbro Kaserne, near Murnau, began to phase out and in November, the Officer and NCO Maintenance Supervisor's Courses were moved to Vilseck. With this move, the Seventh Army Combined Arms School was re-designated as the USAREUR Combined Arms Training Center (CATC) on 01 July 1971. Another page in the book of the Seventh Army Training Center's constantly expanding support role was added in 1973 with the announcement that it would assume the support and command roles for all USAREUR individual training activities in Europe. Combat support courses from the Combat Support Training Center, Oberammergau, were moved to Vilseck.

VISION MISSION LINES OF EFFORT

Vision

The Combined Arms Training Center will be an Institute of Excellence designed and organized to meet the training requirements of the Soldiers of the future.

Mission

The 7ATC Combined Arms Training Center (CATC) is the institutional training organization that facilitates and coordinates training programs to meet USAREUR training requirements and operational gaps.

Lines of Effort

Modernization: Modernize education and training by deliberately updating the capability of facilities to meet the Enterprise Classroom Standards, emphasizing professional development of the faculty, enhancement of course material, and improving course delivery systems.

Compliance: Conduct quality courses through compliance with US Army and USAREUR Regulations, US Army and NATO quality assurance programs, and the integration of the instructor competencies and evaluation processes, both formative and summative.

Innovation: Spur innovation through inspired instructors, modern classrooms, meaningful content, and engaged students.

End state

Rapidly empowering Soldiers through training and education CATC is an internationally recognized Institute of Excellence that has modernized its instructional systems and delivery methods to provide the latest in educational content. CATC courses allow students to rapidly develop critical skills and upon graduation become an SME with reach back to training materials and expert instructors. CATC uses learner-centric instruction practices to promote interactive and collaborative curricula that prepare Soldiers to fight and win on the battlefields of 2025 and beyond. The Soldier of the future demands these actions, as they are digital natives who must be team-focused, and who cannot be displaced from their units for long periods for individual training.

- ✓ Facilitated 64 courses; 583 separate classes (in-resident, DL, ranges, staff rides, MTTs, and external agencies)
- ✓ 1,682 students from the Regionally Aligned Forces (12% of student load)
- ✓ 383 students from Allies and Partners across 19 countries for 16 MASL courses.
- ✓ 14,142 CATC Trained (ATRRs Code 757)
- ✓ Total Institutional training: 22,661 (CATC, ATRRS, NATO, CONUS MTTs, Language, and Resiliency)

CATC Allies and Partnered Courses

As a NATO Accredited Institution, CATC offers several opportunities to Non-US personnel.

Military Articles and Service List (MASL)

The Military Articles & Services List (MASL) is a catalog of descriptive codes and text used to identify materiel and services available to be transferred to foreign governments and international organizations. The codes and text are used in a myriad of systems to identify what is being transferred and to track logistics and financial transactions (e.g., Letters of Offer and Acceptance [LOAs] documents, lease documents, bills sent to the customers, storage facility inventory lists, shipping documentation, surcharges) and perform diverse reporting.

CATC MASL List (Available to NATO/PfP)

- Advanced Brigade All Source Training – B272001
- Air Lift Planners Course (UMO-152) – B229931
- Brigade All Source Training – B272000
- Combat Lifesaver Course (MED 106) – B279006
- C-IED Trainer (C-IED T3) – B223002
- European HAZMAT Certification (HAZ 15) B252003
- Hazardous Material Drivers Training Course (HAZ 11) – B252001
- MAXXPRO DASH 101 – B223000

BARRACKS / LODGING

Rose Barracks Vilseck, DE 92249

All in-processing students who require CATC barracks will report to STUDENT DETACHMENT BLDG 163B on Rose Barracks in Vilseck. If your class starts on a Monday your report time is Sunday between the hours of 1300-1600. If you are reporting for a CATC course and DO NOT require billeting, then you DO NOT need to in-process with Student Detachment and can report straight to your classroom on the start date. Student Detachment handles lodging and operating hours are normal duty hours from 0900-1600, USAREUR duty days at the barracks office Bldg. 163B, Rose Barracks.

ONLY STUDENTS WITH A CLASS RESERVATION HAVE A RESERVED BARRACKS SPACE AND STUDENTS ON A WAIT OR WALK ON STATUS CAN REQUEST BARRACKS ON A SPACE AVAILABLE BASIS!

All military TDY students that stay in the CATC Barracks are required to attend a mandatory accountability formation at 0600 on every duty day while attending their CATC course. Those students who are in Vilseck or Grafenwoehr; Tenant Units are required to attend their Unit Accountability and PRT formation. Uniform is the Army Physical Fitness Uniform (APFU) or your service equivalent.

CATC Student Detachment (In-processing):
DSN 476-2432/2498/2571 or Commercial 09662-832432/2498/2571
Cell: 0162-2966449 (Duty hours)

Linen and transportation are not provided. A military dining facility, AAFES food outlets, CATC Barracks, and classrooms are within walking distance on Rose Barracks.

CATC does not issue Statement of non-availability: lodging is provided and government meals are provided at the government meal rate for those on separate rations.

CATC Student in-processing
Südlager 163b
92249 Vilseck, Germany

Location: 49.639400, 11.797814

Mobile Training Teams (MTT) to USAREUR

The following courses are conducted Mobile Training Teams to US Army Europe (USAREUR) on a recurring basis; in most cases, several times per fiscal year:

- SHARP Foundation
- Cavalry Leader's Course
- Precision Fires, Target Mensuration, Precision Fires
Weaponeering Certification
- Joint Fires Observer
- Sling Load Inspector Certification TC-AIMS II
functional User
- Support Operations
- Small Unmanned Aircraft Master Trainer
- Sustainment Automation Support Management
- Jumpmaster
- Pathfinder
- Air Assault & Rappel Master
- Battle Staff NCO
- Combative Master Trainer
- Master Fitness Trainer
- US Army Special Technical Operations Planner
- Theater Sustainment Planner Course
- Recovery Operations

A unit assigned to USAREUR is tasked to host the courses listed above, therefore, allocations for seats will be prioritized appropriately. **Contact unit level Training Managers for a reservation.**

Hazardous Materials Driver Training Course (HAZ 11)

Description: the Hazardous Materials Driver Training Course (HAZ11) covers the duties and responsibilities of the vehicle operator for safe and legal transport of bulk hazardous materials over European roads. Special emphasis is paid to German laws, considering most students will operate vehicles in Germany. Upon graduation, each student is issued a photo ID card called an Accord European Relatif au Transport International des Marchandises Dangereuses par Route, better known as the “ADR card” or an “ADR certificate.” The HAZ-11 course is mandated by AER 350-1. ADR certification is valid for 5 years and is required by law to transport hazardous cargo in Europe.

Note: Military Vehicles transporting HAZMAT as part of its Unit Basic Load (UBL) do not require ADR certification. Contact your unit Dangerous Goods Advisor and see ADR for a full list of exemptions.

Prerequisites: Must have a driver license for the HAZMAT vehicle they will be operating, DA Form 5984-E (OF 346) or DA Form 348-E (DA 348). Must provide a passport size colored photo at the start of the course. Must have approved DTS orders. Must have 1-year retainability after course completion (waiverable). Must meet prerequisites on Unit Commander's Checklist. Certification is valid for 5 years. Failure to meet prerequisites will result in dismissal from the course.

Course Capacity: 25

Duration: 40 Hours / 5 days

MTT capable: Yes

ATRRS Course Number: CATC-HAZ 11

School Code: 757

MASL Number: B252001

ETOC Course Code: LOG-LG-21808

European HAZMAT Certification (HAZ 15)

Description: This course is designed to train and certify Army and European personnel to prepare documents required to transport hazardous material in Europe. This course complies with the requirements of the Army in Europe to train responsible persons as outlined in AE REG 55-4 and the European Agreements for the transport of hazardous material over public roads and by rail (ADR/RID). This course provides students with instructions on how to properly use governing regulations (AER 55-4, ADR, RID) while providing examples of how to solve the most common transport problems facing the US army in Europe. Training will also cover multi-modal transport and the guidelines for cargo and document preparation. HAZ 15 is valid for 5 years.

Prerequisites: Students must be at least an E-5 (SGT or higher) or civilian/local national whose employment requires the certification and have successfully completed HAZ-12 or TTHM (see next page) within the past 12 months. Student must provide proof at the start of class that they have graduated from HAZ-12 or the TTHM course. A memorandum from the commander is required if there is no proof of course HAZ-12 or TTHM completion. Proof must be provided one week prior to start of class. Must have 1-year retainability in USAERUR after course completion.

Course Capacity: 25

Duration: 24 Hours / 3 days

Available to Non-US personnel: Yes

MASL Number: B252003

ETOC Course Code: LOG-LG-21809

Technical Transportation of Hazardous Materials (TTHM)

Description: This course provides personnel from all services detailed technical information pertaining to all phases of transportation of hazardous materials and satisfies the mandatory training for persons who certify hazardous materials and conduct function specific training for subordinate personnel as specified in the Defense Transportation Regulation (DoD 4500.9-R). Course content includes emphasis on United States and international laws and regulations covering transportation of hazardous materials by all modes. International regulations covered include the International Maritime Dangerous Goods Code and the International Commercial Air Transport Associations Dangerous Goods Regulations. United States regulations covered include the Department of Transportation (DOT) 49 Code of Federal Regulations (CFR) and U.S. military regulations. Course material includes emphasis on hazard communications (i.e. shipping papers, marking, labeling, and placarding); packaging, compatibility on transport vehicles, security requirements and emergency response information. 9E-F58/322-F37 (MC) (HAZ 12) is valid for 2 years.

Prerequisites: Must be appointed as or scheduled to be a Hazardous Material transport certifier, or supervise or plan Hazardous Material transport functions. Must have 1-year retainability after course completion.

Course Capacity: 30

Duration: 80 Hours / 10 days Available to Non-US personnel: Yes

MTT capable: Yes

ATRRS Course Number: CATC-9E-F58/322-F37 (MC)

School Code: 910

MASL Number: B252002

Note: TTHM (9E-F58/322-f37 (MC) has moved to school code 910V as of FY 19. Please contact ATRRS office at 476-3542/2755 to schedule seats

Unit Movement Officer Deployment Planning (UMODP)

Description: This course is mandatory training for all UMOs (primary and alternate) IAW AR 525-93. This course addresses the mobilization and deployment processes at various levels of command within the Army. Focus of the course is on legal authorities, mobilization concepts, plans, policies, procedures, and the responsibilities for mobilization and deployment at DOD, HQ DA, ACOM, CONUSA, JFHQ, USARC, and installation levels. Mobilization and deployment planning interfaces at various Army command levels and the dependency of mobilization and deployment activities on automated systems is emphasized.

Prerequisites: Active and Reserve Component Commissioned Officers in grades Lieutenant through Lieutenant Colonel and Warrant Officers who are appointed to or under consideration for appointment to a unit/staff movement position involving unit strategic deployment or unit movements by surface modes. Enlisted personnel in grades Sergeant, Corporal for USMC, and above on unit orders as the Unit Movement NCO, whose actual or anticipated duty requires a working knowledge of unit deployment/movement planning. DOD civilians who are appointed or under consideration for appointment to an installation/staff position requiring working knowledge of unit deployment/movement planning. International Officers/NCOs meeting these prerequisites can also attend the course.

Course Capacity: 24

Duration: 80 Hours / 10 days

Available to Non-US personnel: Yes

MTT capable: Yes

Air Lift Planners Course (UMO-152)

Affiliated Contingency Load Planning Course

note: new name

Description: This course is designed to provide unit movement officers and supervisory personnel with the knowledge and skills required to conduct airlift planning as part of a joint combat airlift operation. Students are trained on load planning principles, determination of proper aircraft weight and balance, and on aircraft characteristics. Successful course completion and receipt of the training certification constitutes authorization for the air load planning official to sign off on aircraft load plans for air shipment of unit cargo, personnel, and supplies. This course is mandated by AER 350-1, which requires all deployable units to have two Unit Movement Officers and two Airlift Planners per company and battalion.

Prerequisites: None

Course Capacity: 24

Duration: 64 Hours / 8 days

Available to Non-US personnel: Country must have ICODES

MTT capable: Yes

ATRRS Course Number: CATC-UMO 152

School Code: 757

MASL Number: B229931

ETOC Course Code: LOG-LG-22084

Maintenance Manager Course (LOG 215A)

Description: This course provides job enhancement training to USAREUR company and battalion maintenance leaders operating maintenance activities in maintenance management policies, procedures, and methods; logistics readiness; safety. GCSS-Army training includes: requesting operational maintenance support, and materiel status processes; Shop Stock Listing (SSL) management; and equipment data reports.

Prerequisites: ALL students will complete the GCSS-Army Training and Certification system (GTRAC) web-based training (WBT) prior to reporting to Combined Arms Training Center (CATC) sponsored resident GCSS-Army training. Must be SGT or above, or civilian equivalent. Must be assigned or scheduled for assignment as a Unit XO, Maintenance Supervisor, BMS, BMT or BMO.3.

Course Capacity: 18

Duration: 16 Hours / 2 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-LOG 215A

School Code: 757

Property Book Course (LOG 72A)

Description: This course covers the Inventory Process in GCSS-Army. Accurate inventories ensure that you are safeguarding the Army's investment and facilitate good property accountability. Whether you are a Property Book Officer or in the Unit Supply room, you are responsible for managing, conducting and completing inventories in GCSS-Army. As Property Book personnel, you will use GCSS-Army and Force Element structures to review and manage the Organizational and logistics information of the UICs or units for which you are accountable. In this scenario, the primary tasks are: - Review the GCSS-Army Organizational Logistics structure. - Explore the Force Element (FE) structure. - Manage Stock Storage Locations (SLocs) for property.

Prerequisites: ALL students will complete GTRAC web-base training prior to reporting to CATC sponsored resident GCSS-Army training. Must be assigned or scheduled for assignment as a PBO or clerk in a PBO office. Warrant Officers with PMOS of 920B or equivalent Commissioned Logistics Officers and Enlisted personnel holding PMOS 92Y, or 920A
Course

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-LOG 72A

School Code: 757

Unit Supply Course (LOG 73A)

Description: This course covers the Inventory Process in GCSS-Army. Accurate inventories ensure that you are safeguarding the Army's investment and facilitate good property account ability. Whether you are a Property Book Officer or in the Unit Supply room, you are responsible for managing, conducting and completing inventories in GCSS-Army. Using the Organizational Supply business area concept, GCSS-Army brings the operations of these two functional areas closer together through the use of centralized data and a common system. A single, shared system, helps remove pre-existing barriers to equipment visibility. Eliminates the need to manually interface with multiple systems to transfer information across business areas. Within GCSS-Army, Organizational Supply represents a special integration that enables Property Book and Supply roles to see and operate on the same real-time data. This creates greater efficiency and accuracy across organizational lines--one version of the "truth."

Prerequisites: All students will complete the GCSS-Army Training and Certification system (GTRAC) web-based training (WBT) prior to reporting to Combined Arms Training Center (CATC) sponsored resident GCSS-Army training. Assigned or scheduled for assignment as primary Unit Supply, including military and civilian supply personnel, supervisors, technicians, and staff responsible for Unit Supply operations. Warrant Officers with PMOS of 920B or equivalent Commissioned Logistics Officers and Enlisted personnel holding PMOS 92Y and 920A.

Course Capacity: 18

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-LOG 73A

School Code: 757

S4 Training Course (LOG 75A)

Description: This course provides professional sustainment enhancement training to a Supply Support Activity (S4) Plant 2000 workforce, supervisors, technicians, and select echelon's requiring functional Global Combat Support System-Army (GCSS-A) instruction. Our GCSS-training includes the following: introduction, Property Management, Communications processing, Job Aid, requisition flow, excess, retention, and retrograde management, inventory management, stockage level management, component management, several management reports, and the standard performance process

Prerequisites: All students will complete GTRAC web-based training prior to reporting to CATC sponsored resident GCSS-Army training. Must be assigned or scheduled for assignment as a PBO or clerk in a PBO office. Warrant Officers with PMOS of 920B or equivalent Commissioned Logistics Officers and Enlisted personnel holding PMOS 92Y, or 920A.

Course Capacity: 18

GCSS-Army Master Driver Admin Ops (LOG 77A)

Description: This course will provide sustainment training in GCSS-Army computer operations. It is intended for Master Driver and managers that are using GCSS-Army maintenance operations. As a Master Driver, students are responsible for creating accurate Operator Permit ID's for operators in an organization, containing their current equipment and training qualifications using GCSS-Army.

Prerequisites: ALL students will complete GTRAC web-based training prior to reporting to CATC sponsored resident GCSS-Army training. Assigned or scheduled for assignment as a Company Level or Higher Master Driver. Activity workforce including military and civilian personnel, supervisors, technicians, and staff responsible for managing motor pool operations. Experience: Warrant Officers, Civilians, and Enlisted personnel with a PMOS/Duty Position responsible for logistical support such as 920B, 920A, 915A, 151A, GS-0346, GS-2001, 92A, 91X, 88M, 88N or equivalent Commissioned Logistics Officers.

Course Capacity: 18

Duration: 8 Hours / 1 day

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-LOG 77A

School Code: 757

Commander's Course GCSS-A (LOG 78A)

Description: The course provides you with an overview of the Commanders Role in GCSS-Army (Global Combat Support Systems - Army). The course will train students on the processes in GCSS-Army that the Commanders need to perform on a daily basis. Students will learn how to approve and disapprove dispatches, approve and disapprove SARP (Small Arms Repair Parts), review the recoverable and repairable report, monitor their Primary and Sub Hand receipts, and view unit stocks. Gaining an overall perspective of the **GCSS-Army** system is the cornerstone for further training and success as the Army completes its transformation to integrated Army Business Systems. This lesson is a required prerequisite for all GCSS-Army **New Equipment Training (NET)** courses. This lesson describes: The historical challenges and disadvantages of **STAMIS**. What **GCSS-Army** is and why the Army chose it to replace STAMIS. The capabilities and benefits of **GCSS-Army**. The mission and scope of GCSS-Army. How **GCSS-Army** training is delivered. Course is an elective in CCFSPCC.

Prerequisites: None

Course Capacity: 18

Duration: 4 Hours / 1/2 day

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-LOG 78A

School Code: 757

Parts Record Clerk Course (LOG 80A)

Description: This course will provide sustainment training in **GCSS-Army** computer operations. The course is intended for operators and managers **GCSS-Army** maintenance operations. This course consolidates the legacy ULLS-G and SAMS-1 functional courses into the new GCSS-Army functional class. The operational functions include system utilities, interfaces, personnel, supply, equipment, maintenance, and reports procedures. Students will proceed through each of the functions and enter data in order to be functional operators and managers at the end of this course.

Prerequisites: ALL students will complete GTRAC web-based training prior to reporting to CATC sponsored resident GCSS-Army training. <http://gcss.army.mil/Training/GTRAC.aspx> Assigned or scheduled for assignment as a Parts Record Clerk Activity workforce including military and civilian personnel, supervisors, technicians, and staff responsible for managing motorpool operations. Experience: Warrant Officers, Civilians, and Enlisted personnel with a PMOS/Duty Position responsible for logistical support such as 920B, 920A, 915A, 151A, GS-0346, GS-2001, 92A, 91X or equivalent Commissioned Logistics Officers

Course Capacity: 18

Global Combat Support SYS Army Warehouse Operations (LOG 82A)

Description: The course provides sustainment enhancement training to a Supply Support Activity (SSA) Plant 2001 workforce, supervisors, technicians, and select echelon's requiring functional Global Combat Support System-Army (GCSS-A) instruction. GCSS-training include the following: Course Overview, (Receiving Section) Receipt Document Processing, (Retrograde Section) Process Turn-in Document, (Storage and Issuing Section) Perform Put-a-way, Pick Procedures and Customer Issue Process. Overview: Perform Inventory and Warehouse Management to include maintaining effective SSA Operations, employment of tactical Enterprise Resource Planning (ERP), Software Application Products (SAP) and system embedded Business Intelligence. Students will be required to identify, access, and utilize DoD approved Internet sites and Data Files.

Prerequisites: ALL students will complete GTRAC web-base training prior to reporting to CATC sponsored resident GCSS-Army training. Assigned or scheduled for assignment as primary Supply Support Activity workforce including military and civilian warehouse personnel, supervisors, technicians, and staff responsible for managing warehouse operations. Experience: 6 months to 1 year SARSS1/2 with duties as Stock Control, Receiving, Issuing, Storage and Turn-in clerks and or supervisors. Warrant Officers with PMOS of 920B or equivalent Commissioned Logistics Officers and Enlisted personnel holding PMOS 92A.

Material and Execution Management (LOG 83A)

Description: This course provides professional sustainment enhancement training to Material and Execution Managers, Logistics Personnel, Soldiers and Civilians at Brigade/Battalion S4/SPO and at Support Operations, Sustainment Brigade (level I material managers), and the Expeditionary Sustainment Command (ESC)/ Army Sustainment Command (ASC)/ Theater Support Command-TSC (level II, and III material managers) that will provide effective oversight to the Supply Support Activities (SSA) within their area of responsibility utilizing Systems, Applications, and Products in Data Processing (SAP) / Enterprise Resource Planning (ERP) environment. This is necessary because a unit's readiness posture depends largely on the ability of the SSA to provide non-mission capable supply to its supported customer units in a timely manner. Material and Execution Managers perform critical actions prior to their units processing requisitions through the SSA. Therefore, this course focuses on four critical areas: Release Strategy/ZPARK, MRP Controller exception errors, MRP Spool messages, errors, and SSA performance monitoring transactions, necessary to ensure appropriate depth of the SSAs' Authorized Stockage List (ASL) are maintained by the MRP Controller. In an ERP system, the MRP controller is responsible for the availability of materials in a storage location and ensures that the correct/relevant materials are procured utilizing effective and efficient methods.

Prerequisites: ALL students will complete GTRAC web-base training prior to reporting to CATC sponsored resident GCSS-Army Material Management Training. Assigned or scheduled for assignment as primary Material Management Activity workforce including military, civilian personnel, supervisors, technicians, and staff responsible for managing Material and Equipment. Experience: 6 months to 1 year with duties as Material Manager, Item Manager, Support Operations NCOIC/OIC, Maintenance Technician/Manager, and or Supervisors responsible for Supply Chain & logistics. Material & Execution Managers, Warrant Officers, Civilians, and Enlisted personnel with a PMOS/Duty Position responsible for logistical support such as 920B, 920A, 915A, 151A, GS-0346, GS-2001, 92A, 91X or equivalent Commissioned Logistics Officers.

Course Capacity: 18

Duration: 40 Hours / 5 days

Finance - Tactical (LOG 88A)

Description: This course explains the basic concepts, key components, capabilities and benefits of the Finance function in GCSS-Army. The GCSS-Army financial mission is to implement tactical financial processes relating to supply and maintenance. It provides timely, actionable information to assist Commanders with decision-making information regarding the Tactical Army's Readiness. Training equipment provided by U'R/CATC. Web access desired, but not required.

Prerequisites:

Proponent: USAREUR HQ, G4

Instructor: DAC / MIL

Duration: 5 Days / 18 Students

Required by: USAREUR G4, pending AER 350-1

Positions Required in USAREUR: As required.

COMSEC Account Manager (CAM)

Description: COMSEC Account Manager is a TRADOC certified course that certifies and provides standardized COMSEC procedures for managing COMSEC accounts in the U.S. Army, and serves as a prerequisite for attending MGC Course. This course is mandatory for all COMSEC officers, both primary and alternate COMSEC Account Managers, Command COMSEC Inspectors and Auditors. This course provides students with standardized instructions on how to properly safeguard and account for COMSEC materials; documenting reports; establishing, moving and closing of COMSEC accounts; threat and security awareness programs; COMSEC emergency procedures; logistics and other duties required of CAM/KOAM's, Command COMSEC Inspectors and Auditors. Instruction consists of check on learning quizzes and exams, regulatory research, conference (lecture), minimum hands-on training utilizing instructor-led and independent student practical exercises. Students will complete an end-of-course written exam.

Prerequisites: Must be a SGT (pay grade E-5) or above, GS-5 and above, officer, warrant officer, or a contractor that meets the specific job requirements. Waivers must be approved by USAREUR G2. Must have Secret or higher security clearance. This may not be waived. The course manager must receive a memorandum signed by the unit security manager validating the individual's security clearance no later than one week prior to the first day of training. Must have at least 1 year remaining in the command after graduation (9 months for short-tour areas). Minimum GT score of 100. Must be a candidate for COMSEC Officer, COMSEC Account Manager, Alternate COMSEC Account Manager, or a Command COMSEC Inspector or Auditor position.

Course Capacity: 15

Duration: 80 Hours / 10 days

Available to Non-US personnel: No

MTT capable: No

ATRRS Course Number: CATC-4C-F22/160-F23

School Code: 757

KMI Management (MGC Operator) Client Node Course

Description: This course is TRADOC accredited and designed to certify skills and knowledge to operate and manage automated COMSEC accounts in the U.S. Army utilizing the Management Client (MGC) workstation. This course provides students with instruction on the Key Management Infrastructure MGC workstation, perform system initialization, interface with other accounts, manage COMSEC material in CMCS channels, order and generate traditional and modern keys, destruction, prepare and submit reports within the KMI hierarchy, identify threats and security incidents, COMSEC emergency procedures, and perform other accounting duties as required. Instruction consists of conference (lectures), hands-on training utilizing instructor-led demonstration and independent student annexed practical exercises. There are a total of 2 exams given during the 10 day course. All students attending must successfully achieve a passing score of 75% of the available points in each of the 2 exams given in order to graduate. There is "No" retest! This course is mandatory for all COMSEC officers, both primary and alternate COMSEC Account Managers/KMI Operational Account Managers, Command COMSEC Inspectors and Auditors.

Prerequisites: Must be a graduate of CATC-INT 34 (COMSEC Account Manager Course) or 4C-F22/160-F23 (COMSEC Account Manager) or CATC-4C-F22/160-F23 (COMSEC Account Manager). Must be SGT (pay grade E5) or above, GS-5 or above, an officer, a warrant officer and contractors that meets the specific job requirements. Waivers must be approved by USAREUR G2. Must have a final Secret or higher security clearance. This may not be waived. The Course Manager must receive a memorandum signed by the unit security manager validating the individual's security clearance no later than one week prior to the first day of training. Must have at least 1 year remaining in the command after graduation (9 months for short-tour areas). Minimum GT score of 100. Must be a candidate for COMSEC Officer, COMSEC Account Manager, Alternate COMSEC Account Manager, or a Command COMSEC Inspector or Auditor position.

Training Ammunition Management Course (TAMC)

Description: This course is designed to introduce unit (BN/Separate Company) and BDE/MSC level command appointed ammunition managers (requestors/approvers) to the requisition process and ammunition management within USAREUR. The course is offered to appointed SSG's and above and or civilian equivalents. Course is NOT an ammunition handler's course, but introduces managers to ammunition forms and publications, determine/build ammunition requirements, manage ammunition authorizations using the Total Ammunition Management Information System (TAMIS), develop an ammunition forecast using TAMIS, create an electronic ammunition request (e581) using TAMIS, manage reports from TAMIS, and the e581 reconciliation process. The course also provides an overview of the following: Ammunition Management Functions, the STRAC process, how to access the online STRAC manual and DA PAM350-38 Use STRAC to build/validate an ammunition requirement.

Prerequisites: Grades- E6 though E9, GS-9 though GS-13, O-1 though O-5 or WO1 though CW5

Course Capacity: 20

Duration: 24 Hours / 3 days

Available to Non-US personnel: No

Small Arms Maintenance for Unit Armorers Course (SAM 31)

Description: This course trains Soldiers to maintain physical security of weapons and Quick Reaction Force (QRF) ammunition in an arms room. Manage weapons maintenance using The Army Maintenance Management System (TAMMS). Perform Organizational Maintenance on the following weapons: M16A2/M4, M203 Grenade Launcher, M2 .50 Caliber Machine Gun, M240 (Series) Machine Gun, M249 Machine Gun, MK19 Machine Gun (grenade launcher), M9 Pistol, M500 Shot gun. Maintain weapons using technical manuals. Manage Categories 1-4 and consolidated arms rooms.

Purpose: To train unit armorers, or Soldiers to serve as unit armorers, to manage an arms room and to perform unit-level maintenance and repair on small arms. Graduates of the course will be qualified to manage arms rooms and to perform unit-level maintenance and repair on a variety of hand-held, shoulder-fire, and crew-served weapons.

Prerequisites: None

Course Capacity: 24

Duration: 80 Hours / 10 days

Combat Lifesaver Course (MED 106)

Description: This course is established by AR 350-1 to provide for immediate, far-forward medical care on a widely dispersed battlefield while awaiting further medical treatment and evacuation. The presence of CLS-certified personnel and aid bags is required by TRADOC Reg 350-6, paras 3- 47 and M-2, for most IET training events. The foundation of CLS is built on the concept and principles of Tactical Combat Casualty Care (TC3). CLS takes the basic knowledge and skills the soldier attained from Common Task Training and addresses the unique aspects of applying emergency medical care to casualties on the battlefield. The advanced management of airway, chest trauma and hemorrhage of the battlefield casualty are all addressed. Triage and Tactical evacuation are also addressed. This course contains written and practical examinations and culminates a final one day STX.

Prerequisites: None

Chemical, Biological, Radiological, Nuclear Defense (CBRND)

Description: This course teaches Chemical Biological Radiological Nuclear (CBRN) defense. Training includes survival in a nuclear, biological, or chemical environment. Soldiers are trained on identifying different biological and chemical agents, overviews of radiological and chemical detection and protection equipment, and maintenance and logistics. The CBRN defense course trains Soldiers on supervising and implementing mission-oriented protective posture (MOPP), Unit level CBRN reports, radiological monitoring, decontamination operations, conducting unit CBRN defense training, and unit radiological operations. Soldiers are also taught how to properly conduct a mask confidence exercise and conducted MOPP gear exchange while being exposed to tear gas. The CBRN defense course is mandated by Army Regulation (AR) 350-1.

Prerequisites: You must be in grade SPC or above, or waiver able to PFC if holding position of CBRN NCO. You must have retainability of one year in unit (waivers for short tour areas only). Must have TACOM LCMC Radiation Safety completed in ALMS.

Individual Replacement Training (IRT)

Description: This course refreshes service members on basic combat skills needed to serve in the EUCOM, CENTCOM and AFRICOM areas of operation and is accomplished in both classroom and field environments. Participants from throughout Europe engage in the high tempo training. The IRT program is the third phase of readiness training that prepares service members and DoD civilians for individual out-of-area mobilization. Days 1 and 2 cover classroom training, including subjects ranging from the Law of War to Basic Lifesaving Measures. Days 3 and 4 are conducted in the field, including practical implementation of other skills taught during the first two days, such as Hand grenades, Counter-Improvised Explosive Devices (CIED), and Land Navigation lanes. Finally, Soldiers qualify on their primary weapons, 9MM and M4, on “Pop-up” qualification ranges at Grafenwoehr Training Area (GTA). This course is designed for: Active, Reserve, and National Guard Soldiers, Sailors, Marines, Airmen, DA Civilian and Contract Civilians.

Prerequisites: None

US Small Arms Weapons Course (USSW)

Description: This course is designed to provide Soldiers with the knowledge and skills required to instruct in the use of US weapons. The Soldiers are trained on operations required to employ the M9 Pistol, M2 Heavy Barrel (HB) .50 caliber Machine Gun, M-4 Carbine, M249 Squad Automatic Weapon (SAW), and M240 Machine Gun. The Soldiers master clearing, disassembly, reassembly, functions check, loading and immediate action procedures. The Soldiers are instructed on zeroing procedures for all weapon systems, along with Basic Rifle Marksmanship techniques (BRM). Machine Gun theory is also covered for target engagement with the 3 different machine guns. The course culminates in a live fire range on day three, at which time the students become familiar with the practical application of the skills they have learned over the first two days of the course. On the final day, the students learn to properly maintain all of the weapon systems.

Prerequisites: International Student Course Prerequisites - Students should be Officers or NCO's with advanced weapons experience prior to attending the course. LANGUAGE: 70% English comprehension.

Urban Breach (UB)

Description: This 10-day course trains Soldiers about the mechanical, ballistic, exothermic and explosive breaching methods. Each Soldier conducts breaches, multiple explosive breach's along with a live ballistic breaching on metal security doors. Instruction consists of the calculation of Net Explosive Weight (NEW), determination of Minimum Safe Distance (MSD), determination of Over Pressurization, Explosive Theory, Deliberate and Hasty Breacher's Brief, Construction Standards, and the fundamentals of proper breaching posture in a stack. Students learn how to construct multiple breaching charges, and are also taught the principles associated with each charge. This training prepares students to successfully construct the proper charge needed to breach various obstacles encountered on the modern battlefield. All Soldiers complete several hours of hands-on training using inert explosives before conducting a live-explosive breaching exercise consisting of multiple targets in an urban environment. Testing included both written and hands-on exams.

Prerequisites: Interviewed and selected by Chain of Command. Must be serving in MOS/Branch CMF Series 11-12-19-313. Must be a SGT and above or if you are an E4 have a waiver. Must not have a profile against field training and lifting of heavy objects.

Biometric Operator Specialist Course (BOSC)

Description: A course that trains students on Army Biometric Equipment to be unit Subject Matter Experts. The course satisfies the AE 350-1 requirement for one trained individual per company-sized unit. Training Includes instruction on the Biometrics Automated Toolset Army (BAT-A) v1 and v2, BAT Handheld with the Mission Oriented Biometrics Software (MOBS) and Multilingual Automated Registration System (MARS). Students prepare all biometrics systems for operation before training on subject enrollment, identification, data transfer, and performance of basic equipment maintenance and troubleshooting. The coursework includes lecture and discussion, live demonstrations, daily checks on learning, hands-on training, practical exercises to reinforce lessons, and culminates with individual testing and validation. BOSC graduates are better prepared to support their commander with staff level biometrics integration.

Prerequisites: Must be a US Citizen.

Course Capacity: 20

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-BOSC

School Code: 757

Biometrics Trainer Course (BX-T3)

Description: Biometric Train the Trainer Course (BXT3) is designed to provide Soldiers with advanced Biometrics Operation skills and the ability to train unit personnel to support commanders with extensive subject matter expertise in all Biometrics systems to include: Biometrics Automated Toolset (BAT), BAT Handheld and Biometrics Enabled Intelligence (BEI) processes and practices. A graduate of the BXT3 Course will be able to train unit personnel to provide the commander with detailed knowledge and understanding of the biometrics process in order to maximize its effectiveness in support of the unit's mission. This course expands on the BOSC by preparing Soldiers to train unit personnel for staff level integration of the BAT/BAT Handheld systems. The course work is supplemented by a series of practical exercises and teach-back sessions that reinforce specific blocks of instruction. Upon completion of the course students will have the necessary skills to: train Soldiers on the incorporation of biometric collection into operations based on knowledge of biometric collection and processing systems and associated equipment and capabilities; train Soldiers to collect a subject's biometric and biographic data, process subject for enrollment and identification into the BAT database; train Soldiers to collect biometrics, biographic and demographic information with the BAT Handheld Device; train Soldiers to transfer data using the BAT Handheld Device; identify a subject with the BAT Handheld Device; train Soldiers to plan for the incorporation of DNA collection into operations based on knowledge of DNA collection, processing and associated equipment and capabilities; train Soldiers to define and describe the elements required to produce Biometric Enabled Intelligence; train Soldiers to define and explain the Biometric Watch List; and plan for and execute Biometrics Operator Specialist Course at the unit.

Counter IED Trainer (C-IED T3)

Description: This course develops Company and Battalion level C-IED trainers on training management at the lower echelon while applying the latest C- IED techniques and principles to increase operational readiness in an IED environment designed to reinforce baseline C-IED principles, ensure an understanding of the 8-Step Army Training Model, and ensures that all participants are able to conduct a C-IED training event, from planning to execution and assessment. Major areas covered: IED and HME Awareness, C-IED Enablers, Ground-Sign Indicators, React to an IED (Dismounted), Global IED Threat Assessment, Biometrics, Site Exploitation Procedures, Vulnerable Area/Vulnerable Point Identification. The training capstone consists of the participants delivering a 3-hour block of field instruction and a practical exercise (PE) on C-IED principles designed to train the Soldiers on facilitating unit training for their Squad, Platoon and Company CIED requirements.

Prerequisites: Interviewed and selected by Chain of Command (BN CDR/Separate Company CDR) The Commander will provide a memorandum for record (MFR) endorsing the applicant as a reliable individual who possess the skill sets to successfully complete training. General knowledge of weapons systems. Must have 1 year retain-ability with present unit. Must be a SGT and above. Must not have a profile against field training and lifting of heavy objects. Possess a military driver operator license for M998

Course Capacity: 20

Duration: 40 Hours / 5 days

Available to Non-US personnel: Yes

MTT capable: Yes

Dismounted Route Clearance Operations (DRCO)

Description: An academic and practical application learning experience for Route Clearance and Sapper Platoons. This course assists units in developing skills for dismounted mobility operations that will enable them to complete dismounted route clearance. Classes include Current Mine and UXO Awareness focused on Ukraine, Global IED Threat Assessment, Biometric Operator, Person Search, Vehicle Search, Building Search, Area Search, Ground Sign Indicators, Dismounted Formations and Movement Techniques, Vulnerable Area/Vulnerable Point Identification, Hand held Detector Refresher, Site Exploitation Procedures. The training capstone consisted of dismounted RCP STX lanes in which the unit is expected to synthesize multiple facets of this training into the effective execution of a simulated dismounted RCP mission.

Prerequisites: Target Audience is UA & MN.

Course Capacity: 18

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-DRCO

School Code: 757

Site Exploitation (SE)

Description: The Site Exploitation course develops knowledge and skills to effectively conduct Materials and Personnel Exploitation to feed future operations and targeting. Instruction is provided in a classroom setting with practical application exercises in a field environment with enabler integration. Training includes Instruction on IED/HME Awareness, Identifying Exploitation Materials, Identifying Forensic Materiel Evidence, Prioritizing Forensic Material; Supervising a team during tactical SE; Conducting Tactical Questioning; Handling EPWs and Detainees;; Processing Tactical Information; and Person / Vehicle / Building / Area Search Fundamentals. The coursework comprised of lecture and discussion, live demonstrations, hands-on training, and practical exercises that culminate with a one day SE situational training exercise (STX). The STX consisted of two exploitation objectives that test the Soldiers' abilities to integrate enablers.

VMR2 Minehound Handheld Detector

Description: This course trains Soldiers on the VMR2 (Minehound) Handheld Detector (HhD). Training includes operational functions and employment tactics, techniques, and procedures for the equipment. The VMR2 course trains selected Soldiers on the proper setup and use of the VMR2 Dual Sensor Detector in Metal Detection (MD), Ground Penetrating Radar (GPR), and combined modes to detect metallic and non-metallic targets. Soldiers receive one partial day of classroom instruction followed by 4.5 days of practical exercises focused on detection of metallic and non-metallic buried hazards in order to receive certification on the employment and usage of the VMR-2. The final day consists of a written test, a graded “teach back” requiring students to demonstrate various tasks to place the HhD into operation, and a lane performance test where students place the HhD into operation, and locate components of an IED and IED systems. **VMR3 training is available for Allies/partners.**

Prerequisites: Target Audience is UA & MN.

Course Capacity: 18

Duration: 40 Hours / 5 days

Available to Non-US personnel: Yes

Counter-Radio Controlled IED Electronic Warfare (CREW)

Description: The CREW/EW course is designed to provide advanced operator and EW personnel the most current techniques and procedures for employing Electronic Counter Measures against the current IED threat along with system sustainment training. In this course students learn the history of electronic warfare, fundamentals in communications and radio wave propagation, as well as the basics of the electromagnetic spectrum. On days 3 and 4, the students perform hands on tasks on the Duke V2/V3 and THOR III systems and the Spectrum Analyzer. Day 5 culminates with practical exercises on the Duke and THOR training systems where students activate the systems, jam a training frequency, troubleshoot multiple faults, downloaded Threat Loads for submission to an Electronic Warfare Officer and zero (or clear) the system. The students are then prepared to support their units by using these systems for protection against IED and electronic warfare threats.

Course Capacity: 18

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: No

ATRRS Course Number: CATC-CREW-SPC

School Code: 757

Counter-Unmanned Aerial Systems (C-UAS)

Description: The C-UAS course is designed to develop company and battalion subject matter experts to assist unit commanders to address the threat of small Unmanned Aerial Systems (sUAS). Soldiers attending the course receive a thorough introduction to Counter unmanned aircraft systems (C-UAS) capabilities/limitations, operations, and tactics, techniques and procedures to counter enemy employment of sUAS. Soldiers will learn to identify current friendly and hostile sUAS, receive an introduction on the electro-magnetic spectrum and control of sUAS, and get an hands-on orientation to current C-UAS systems including Drone Defender, Drone Buster, VROD/VMAX, and vehicle mounted systems. The course work is supplemented by a series of practical exercises that reinforce specific blocks of instruction. Upon completion of the course students will have the necessary skills to: understand the incorporation of C-UAS systems into operations based on knowledge of Army C-UAS doctrine, sUAS capabilities/limitations, and the electromagnetic spectrum, links and communication.

Prerequisites: None

Course Capacity: 16

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: No

ATRRS Course Number: CATC-C-UAS

School Code: 757

Brigade and Battalion Command Team Course

Description: This course provides USAREUR Brigade/Battalion Commanders and Command Sergeant Majors, and IMCOM-E Garrison Commanders and Command Sergeant Majors – conducted as a split venue course – an orientation to USAREUR policy and procedures through orientation briefs from USAREUR and IMCOM-E Staff Sections in Wiesbaden and training orientations through tours of Grafenwoehr Training Area and JMRC at Hohenfels Training Area. The course includes briefings from the USAREUR CG, CSM, and Primary General Staff and 7th Army Training Command. Subject areas include command policy/vision, personnel administration, support, logistics, training, operations and intelligence. OPEN to DA Civilians in key leadership roles in the grades of GS14/15 or equivalent.

Prerequisites: Officers and CSMs scheduled for assignment as commanders or CSMs of a brigade, regiment, group, USAG, or battalion must attend the UPCC. Officers and NCOs will attend the course up to 4 months before (but no more than 60 days after) assuming command or CSM duties. Requests for exception must be routed through the first GO or O6 in the chain of command to the USAREUR G3/7 TREX.)

School Code: 757

Equal Opportunity Leaders Course (EOL)

Description: Course graduates are certified to work as EOLs within their command. This course is designed to train Organizational Equal Opportunity Leaders by providing a foundation for understanding group dynamics and the communication process, increasing awareness of racist or sexist behavior, and to identify discrimination based on race, sex, cultural, or ethnic differences. EOL is conducted in four phases. Phase I – Socialization Process, Phase II – Communication and Conflict Management Skills, Phase III – Aspects of Discrimination, Phase IV – Army EO Program, EOL Tasks and EOL Responsibilities. This sixty hour course trains and certifies NCOs and Officers to work as EOLs. Army Regulation 600-20 Chapter 6 outlines the Army's EOL program, and the requirement for EOLs within an organization.

Prerequisites: Complete EOLC application (signed by SM commander and EOA). Be assigned on orders as either the primary or alternate EOL for your organization. Must be SGT promotable (verification by Commander) or above and a member of the unit chain of command. Must have 1-year retain-ability in USAREUR as an equal opportunity leader.

Course Capacity: 20

Duration: 60 Hours / 7 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-EOL 471

Safety Officer/NCO Course (SOC 40)

Description: The USAREUR Safety Office provides the Subject Matter Experts with Safety Officer/NCO Training. Prior to attending SOC 40, students must have successfully completed the Additional duty Safety Officer Course. Resident training focuses on training unit safety personnel in the laws, standards, and regulations applicable to tactical and garrison operations; risk management; motor maintenance operations; unit safety program organization and management; safety standards for ammunition, explosive, and POL handling and storage; wheeled and tracked vehicle safety; railhead operations; range and bivouac safety; fire prevention; accident investigation and reporting procedures, and safety in tactical operations. This course is mandated by AER 350-1.

Prerequisites: Comply with AER 350-1. Brigade and Battalion safety officers, and Company Safety Officer/NCO will complete the CATC safety Officer Course SOC 40. IAW AR 385-10, para 2-7g. Both Commissioned and Non-Commissioned Officers MUST complete the online ADSC (Course # 2G F95 DL) via ATRRS OR ALMS (AKO) before enrollment, no other course is applicable. SGT/E5/GS-6 Civilians will be accepted into the course; however, commanders should not place them on orders as the primary safety officer.

Course Capacity: 30

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

Anti-Terrorism Officer (USAMPSCH)

Description: The ATO course encompasses training students in the roles and responsibilities of an ATO at brigade level and below. Training includes: Conducting a risk assessment, preparing a local threat assessment, conducting a criticality assessment, conducting a vulnerability assessment, and active shooter-inside the wire threats. The Antiterrorism Officer Course trains ATOs for brigade or equivalent level, and below duties. This course is designed to train personnel to perform the duties of an Antiterrorism Officer (ATO). Antiterrorism officer course students must be SSG or higher. SGT's with a strong waiver justification may be excepted pending approval from the MP school at Ft. Leavenworth.

Prerequisites: None

Course Capacity: 40

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: ATO LEVEL II

School Code: 517

DTMS Manager Course (DTMS-MC)

Description: The course covers fundamental concepts of Training Management translated into action through DTMS, allowing units to effectively plan, resource, and execute training events. The course is designed to equip unit master trainers with the knowledge to effectively teach future users and operate the system in order to assist unit commanders in capturing unit training proficiencies.

Prerequisites: Recommend student attend a Digital Training Management System (DTMS) Operator/User Course with the Unit DTMS Manager or self-paced training on the Army Training Network's(ATN) DTMS Knowledge Base and have a basic understanding of the Unit Training Management process. While an E-6 can attend this course USAREUR G37 TREX still requires the Unit Master Trainer at Brigade Level to be an E-7.

Course Capacity: 16

Duration: 40 Hours / 5 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: CATC-DTMS-MTC

Battle Staff Assistant Instructor Course

Description: Prepares designated individuals to perform as Assistant Instructor (AI) during the execution of the Battle Staff NCO Course (DI). Individuals are indoctrinated to the Course Management Plan and are prepared to continue training in the event of network outage.

Prerequisites: SFC and graduate of the Battle Staff NCO Course

Proponent: USASMA/USAREUR G3 (CATC)

Instructor: MIL (USASMA)

Duration: 3 Days/16 Students (VTC/DL type fac req'd)

Required by: TRADOC 350-70

Positions Required in USAREUR: As required

Master Resiliency Training (MRT) Level 1

Description: The course produces leaders with the capability to teach proven resilience skills to the Soldiers in order to enhance their performance and increase their resilience, both individually and collectively. The MRT course is an established training program that has demonstrated efficacy in reducing behavioral health problems in a wide range of demographics. Soldiers will review the myths about resilience and why resilience is critical for success and well-being. They will also learn about the scientific literature of the core factors that predict resilience, with a specific focus on the factors that are amenable to change. Ideally, Soldiers taking this course will return to the force as drill sergeants, squad leaders, platoon sergeants and platoon leaders, first sergeants and company commanders and they will be expected to train these skills to those Soldiers in their unit. The MRT's can also serve as a stand-alone MRT for a unit, post or geographical area based upon the command guidance and mission need. Additionally, they will serve as subject matter experts for their commanders. Soldiers receiving this resilience training and become certified MRT's will learn resilience and performance enhancing skills and how to teach them. These skills have a proven efficacy in contributing to the success of teams, leaders, families, students, executives and military personnel.

Prerequisites: Enlisted: E6 to E8, Warrant Officer WO1 to CW4, Commissioned Officers O1 to O4, Civilians GS7 to GS12. Sergeants in the grade of E5 with a promotable status are permitted to attend, but must be recommended by name through their Command. Must meet H/W IAW AR 600- 9.

Course Capacity: 30

Duration: 80 hours / 10 days Available to Non-US personnel: No

MTT capable: No

ATRRS Course Number: MRT-C

School Code: 145Z

Executive Resilience & Performance Course (ERPC)

Description: This course is designed to train Army Leaders (Company Commanders/ First Sergeants and above, their spouse, GS-12 and above), and familiarize them with the same Resilience and Performance Enhancement skills Master Resilience Trainers provide Soldiers, Family members and Army Civilians. Certified Master Resilience Trainer Performance Experts (MRT-PE) instructors are specially trained to deliver this executive level curriculum, and are available at R2 Performance Centers at installations Army-wide. For those without a R2 Performance Center, Mobile Training Teams are standing by to support.

Prerequisites: Enlisted: E7 and up, Warrant Officer CW3 and up, Commissioned Officers O3 and up, Civilians GS12 and up.

Course Capacity: 30

Duration: 4 Hours

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: N/A

School Code: N/A

READY & RESILIENT (R2)
PERFORMANCE CENTER

Engage

Description: This course is the Army's skill to help Soldiers, DA Civilians and Family Members develop the ability to intervene safely, early and effectively when they see something happening that could potentially have adverse or drastic effects. This course is a facilitated discussion, intended primarily for junior leaders, gets participants thinking about the barriers to intervening and the necessary components to engaging to help others. Having situational awareness to notice what's happening and seeking additional information. Taking responsibility and understanding that your choice could impact you or your community in the future. Having a plan of action before taking action.

Prerequisites: N/A

Course Capacity: 30

Duration: 3 Hours

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: N/A

School Code: N/A

**READY & RESILIENT (R2)
PERFORMANCE CENTER**

Leader Development Course (LDC)

Description: The course enhances the capability of Soldiers to recognize, in self and others, the key factors of optimal performance, and develop the ability to apply and communicate specific mental techniques designed to maximize mental strength and set the conditions for consistently high levels of performance. This course focuses on the underlying knowledge and mental competencies (i.e., motivation, attention control, confidence and energy management) required for self-awareness and self-regulation, which are necessary conditions for leaders to be able to think critically and creatively. This approach specifically targets the "BE" aspects of BE, KNOW, DO. The vast majority of Soldiers notice that those leaders that they admire most are most often a result of "Who" they are as a person and "How" they are as a person, rather than what they do. This course will provide an opportunity to broaden understanding, and learn the practical skills for developing and honing the "BE" mental and emotional attributes. By the conclusion of the course, Soldiers will have created a Portfolio of personalized mental skills to apply to an upcoming performance. In addition, the course provides a specific method for continual influence of their developed philosophy of excellence, executable within "coachable moments" found in training with peers and subordinates. Leaders teach, coach and mentor. Lastly, the outcome of this course is to rapidly evolve the next generation of junior leaders, so that they perform far beyond their given experience and training.

Prerequisites: Attendees must be E4(P)/E5 or higher, preferably in a leadership position. E4-E6; O1-O2 (Target Audience) but leaders of any rank are welcome.

Battlefield Staff Ride (BSR)

Description: Battlefield staff rides furnish commanders a unique and powerful leadership development tool, which enables them to accomplish a range of objectives benefitting the United States Army and the United States Army in Europe in the long and short term. Battlefield staff rides use battlefields as a metaphor to illuminate and improve current and future activities, including United States Army leadership and leader performance in a variety of ways. Successful battlefield staff rides require combining three elements: the intellectual, including factual details of combat sequence, time, and chronology, presented in a variety of compelling and stimulating ways (written, spoken visual); the physical, actually visiting past battlefields (on the ground in a variety of ways); and the emotional, to provoke an awareness and understanding of the impact of past combat on soldiers in order to increase a powerful understanding of what really happened. These elements combine the training needs of the command and each particular unit in order to "turn yesterday into tomorrow".

Prerequisites: None

Course Capacity: 25-45

Duration: 24 Hours / 3 days

Available to Non-US personnel: No

Environmental Compliance Officer Course (ECO 100)

Description: The Environmental Compliance Officers Training (ECO-100) is designed to educate garrison and unit personnel on the impacts their job may have on the environment, and what they are required to do to ensure that their organization stays in compliance with environmental laws and regulations, especially in regards to Host Nation requirements. The course is required for those who have been assigned the duties of unit/organization Environmental Compliance Officer, as part of the Army in Europe. Description: The Environmental Compliance Officers Training is a 40-hour, **online training class** designed as an interactive, self-study program consisting of nine modules, eight quizzes (do not count toward final grade) and one final test (must get 80% to pass). Modules cover topics such as hazardous materials, hazardous waste, spill response and pollution prevention. This course is offered in English, German and Italian. You can take the course in any language. You do not need to take this course in all three languages to complete the course.

Ammo Handlers Certification Course (AHC)

Description: This course is designed to prepare students to safely conduct unit ammunition operations in a garrison and/or field environment. The course presents material necessary to ensure students acquire a fundamental understanding of general, ammunition and explosive (A&E) identification, functioning, and hazards, as well as general and USAREUR specific safety, security, transportation, receipt, turn-in, storage, management, accountability, and training reconciliation procedures. This course is intended for personnel who have been designated by their command as responsible for AHA operations and/or receipt and turn-in of ammunition. The Ammo Handler Certification Course certifies that individuals possess the prerequisite knowledge and skills required to implement appropriate security, safety, and accountability procedures required to perform the following: 1. Receive & turn-in unit ammunition from USAREUR Ammunition Support Activities (ASA) IAW AR 710-2, DA Pam 710-2-1, DA Pam 700-16, AE Regulation 55-4, and other applicable guidance. 2. Operate a unit ammunition holding areas (AHA)/approved explosive storage facility, in a garrison and/or field environment, IAW AR 385-10, DA Pam 385-64, and DA Pam 742-1, AE Reg 385-10, AE Reg 742-2, and other applicable guidance.

Prerequisites: Minimum recommended rank is SGT (E-5), however this is not mandatory. Physical Profile: 222221. Must not have a profile against field training. Be capable of occasionally lifting up to a maximum of 80 pounds with frequent or constant lifting of 25-35 pounds. Non-allergic to explosive components. Normal color vision.

Simulation Professional Course (SIMPRO)

Description: Provides individuals with an understanding of the roles, responsibilities, practices, procedures, and concepts necessary to integrate models and simulations into the organizational environment. The curriculum emphasizes the following topics: fundamental knowledge of modeling and simulation program management; technical aspects of simulation; employing simulations; cross domains issues; application of simulations within the M&S communities. This course is tailored to the needs of the requesting organization --from one lesson or up to three weeks-- of modeling and simulation training.

Scope: The Simulation Professional Course will enable students to: Provide an understanding of model & simulation concepts, and the ability to discuss applications within a specific modeling and simulation environment. Provide an understanding of interoperability & architecture issues within the modeling and simulation environment.

Prerequisites: Commissioned Officer Personnel: Active Army and Reserve Components, grade O1 and above. Civilian Personnel: Grade GS7 and above, and DA Interns. Enlisted Personnel: Active Army and Reserve Components grade E-6 and above assigned to simulation operations positions.

Staff Evaluation and Assessment Team (SEAT)

Description: The primary purpose of this training is to equip evaluation and assessment augmentees with the relevant knowledge needed to serve as evaluators/assessors during unit CPX, STAFFEX's, etc. This training is designed to provide units with trained augmentees capable of observing/evaluating staff processes IAW each of the warfighting functions. Courses are given from an evaluator-assessor standpoint drawing on trends from major exercises and the Combat Training Centers. Courses are based on current doctrine and provide tools, tips, and best practices. Over-the-shoulder staff support is available to units during major exercises, CPXs, or other training events.

Program of Instruction (POI) includes:

- Staff Evaluation and Assessment (Observation/Evaluation) Academy
- After Action Reviews
- Command Post Operations
- Military Decision-making Process
- Mission Command Warfighting Function
- Fires Warfighting Function
- Intelligence Warfighting Function
- Movement & Maneuver Warfighting Function

Additional services include:

- Customized programs to meet unique unit training objectives.
- Tailored weekend and annual training courses for Army Reserve Units.
- Two- or three-day SEAT (Observation/Evaluation) Academies (includes POI above).
- Over-the-shoulder support as the training audience works through staff processes related to an exercise.
- MSEL development and White Cell support.
- Assistance with AAR execution.
- Routinely conducted in the Bavaria, Kaiserslautern and Vicenza military communities. Other locations can be serviced with additional coordination.

Joint Automated Deep Operations Coordination System (JADOCS)

Description: is a joint mission management software applications that provide a suite of tools and interfaces for integration across battlespace functional areas focusing on the Joint Target Cycle. JADOCS provides timely, accurate, detailed battlespace view for target nomination and vetting, target execution and coordination, air operations information, intelligence operations information, battle damage assessment and campaign plan. JADOCS Operator's Course provides basic skills to operate JADOCS in a tactical MCIS Environment.

Prerequisites: None

Course Capacity: 8-12

Duration: 24 Hours / 3 days

Available to Non-US personnel: No

MTT capable: Yes

ATRRS Course Number: N/A

OPFOR Mentoring

Description: This class covers subjects such as offensive/defensive tactics, march formations, disposition, composition, equipment familiarization, and hands-on exercise training. The hands on training will consist of performing battle drills in simulation to become familiar not only with how to the OPFOR fights, but with the timing and execution of the tactics simulation. The Soldier will provide their unit subject matter expertise for use as OPFOR during war-gaming, and unit exercises.

Prerequisites: None

Course Capacity: 10

Duration: 40 Hours / 5 days

Available to Non-US

Staff Courses

Description: Adult learning-styled seminars with facilitated discussion that utilizes doctrine, best practices, and training audience experience in a multimedia format. Specific course material will be adapted to meet the unit's internal training objectives. The following Programs of Instruction are available:

- ✓ Mission Command
- ✓ Military Decision Making
- ✓ Process Army Design
- ✓ Methodology Command
- ✓ Post/Center Operations
- ✓ Staff Operations & Organizations
 - ✓ Operational Environment
 - ✓ Operational & Mission
 - ✓ Variables Battle Rhythm
 - ✓ Common Operational
 - ✓ Picture Knowledge
 - ✓ Management
 - ✓ Information management
- ✓ Inform and Influence Activities
- ✓ Decisions during Execution
- ✓ Rehearsal and Preparation
- ✓ Activities Team Building
- ✓ NATO Comprehensive Operations Planning Directive
- ✓ Joint Operation Planning
- ✓ Process Foreign
- ✓ Consequence Management
- ✓ Crises Response Training
- ✓ Non-Combatant Evacuation
- ✓ Operations
- ✓ NATO Crisis Management
- ✓ NATO Peace Support Operations

Stryker Virtual Collective Trainer (SVCT)

Description: The SVCT allows Stryker platoons and dismounted infantry to operate as a collective system in force-on-force scenarios. The SVCT simulates the capabilities of a Stryker rifle (four vehicles, 45 infantryman) or scout platoon (six vehicles, 36 scouts) and their symbiotic relationship with the dismounted crew. The physical vehicle mock-up includes each key mounted crew position – driver, gunner, squad leader, and two air guards – with both “outside the hatch/unbuttoned” and “inside the hatch/buttoned” positions.

The simulators are equipped with a combination of authentic military gear, Xbox controllers, luxury gaming chairs, and foot pedals designed for racing games. The gunner’s seat comes directly from a Stryker vehicle and has a Common Remotely Operated Weapon Station or CROWS and joystick, allowing the Soldier to fire a virtual .50-caliber machine gun and, in some cases, virtual 30 mm autocannons.

International Special Training Center (ISTC)

ISTC's Mission

Since 1979, the International Special Training Centre (ISTC) provides advanced, specialized training for Special Operations Forces (SOF) and similar units in the vicinity of Pfullendorf, Germany in order to increase capability & interoperability among the nine signatory nations (BEL, DEU, ITA, GRC, NLD, NOR, TUR, USA and ROU) as well as other NATO Allies and Partners using the "Smart Defense" strategy.

ISTC's Vision

ISTC recognized as a "Go To" Tactical Level Special Operations Education & Training Facility. ISTC maintains our Quality Management System as a NATO Accredited Institution. All Instructors are trained Subject Matter Experts. ISTC delivers the SOTG Operations Planning, Military Assistance, TCCC Train the Trainer and NSOCM Courses as "Approved" NATO Courses. The ISTC continues to deliver the highest quality advanced & specialized Combat, Sniper, Planning and Medical Courses in support of National Requirements.

NATO Unconditionally Accredited Education & Training Facility

The International Special Training Centre (ISTC) is a multinational Education and Training Facility (ETF) based on a Memorandum of Understanding (MoU), undersigned by the nine member nations (Belgium, Germany, Greece, Italy, the Netherlands, Norway, Turkey, Romania, and the USA in the role of the Lead Nation). It aims to provide advanced and specialized training, at the tactical level, for Special Operations Forces (SOF) and similar units from the MoU, NATO and Partnership for Peace (PfP) nations. ISTC is co-located in the same barracks (Staufer Kaserne) with the German national Special Operations Training Centre (SOTC).

Advanced Medical First Responder Course (AMFR)

Description: This medical course is designed to train medics and non-medics through the medical skills required to treat, stabilize and prepare battlefield casualties for MEDEVAC with minimal support. The course focuses on primary survey and stabilization of a casualty, conduct of tactical combat casualty care, triage and preparing for evacuation, and MASCAL environments. Graduates of this course will be able to assess, treat, and stabilize a casualty enough to prepare and properly evacuate the casualty to further treatment.

Prerequisites: Students should have some prior medical training prior to attendance. Students may be officers, NCOs or enlisted Soldiers. Pre-course study in basic anatomy, physiology and Pre- Hospital Trauma Life Support (PHTLS), as well as prior medical training (at least to Combat Lifesaver Level) is highly encouraged. Students must score 70% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test upon arrival. For further course Pre-Requisites and Details refer to www.istc-sof.org or contact usarmy.bavaria.7atc-istc.list.istc@mail.mil

Course Capacity: 24

Duration: 150 Hours / 15 days

Advanced Casualty Sustainment Care Course (ACSC)

Description: This medical course is intended to train students how to sustain casualties in an austere environment for up to 36 hours. This course focuses on the secondary survey of a stabilized casualty in an austere environment, evacuation of a casualty, sutures of minor wounds, chest drainage, nasal gastric intubation, urinary catheterization, endo-tracheal intubation, intra-osseous infusion, neurological exam, and preventive medicine. This course is designed for trained medics and to provide skills necessary to stabilize a patient beyond the primary survey.

Prerequisites: The course is intended for certified medics. Students must be graduates of the ISTC AMFR course, the former Patrol Medical Course (PMC) or a national course of the same level. Students will be expected to pass a Medical Knowledge Entry Test. Students may be officers, NCOs or soldiers. Pre-course review of basic anatomy, physiology, and Pre-Hospital Trauma Life Support (PHTLS) is highly recommended. Students must arrive with HIV and Hepatitis B, C negative (no older than 3 months), and Tetanus Immunization documentation. Students must score 70% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test upon arrival. NATO Special Operations Combat Medic Course (NSOCM)

Description: The objective of the NSOCM Course is to transform the International SOF - First Responder into a Special Operations Combat Medic with a scope of practice to effectively treat life threatening injuries in an austere - tactical environment to reduce mortality and morbidity by sustaining life beyond the doctrinal medical evacuation timelines. The intent of the NSOCM course, is to provide training for 24 students on advanced combat trauma management with a special emphasis on Clinical Medicine and Prolonged Field Care. The course meets the standards, given by NATO Special Operations Head Quarters (NSHQ), which defines the NATO standard for the Scope of Practice of the SOCM. This course is IAW the NATO SOF Training Standards Directive NSHQ-MED Directive 75-001 (B) 29 May 2017, using current Committee of TCCC and PHTLS Guidelines. The course is modular in composition and includes basic science, trauma fundamentals, operational medical planning, TCCC, rescue techniques, clinical medicine, prolonged field care, FTX, and clinical rotations.

Prerequisites: The course is intended for SOF operators serving or designated to serve as a SOF team medic or a SOF troop/platoon medic. Students must be graduates of the ISTC AMFR course or of equivalent national level SOF medical training course in accordance with NSOFAFR critical tasks or have higher medical training. Students may be officers, NCOs, or enlisted soldiers. Students will be expected to pass a Medical Knowledge Entry Test, a Physical Training Test, and an English Comprehension Test. Students must score a minimum of 70% on the Medical Entry Test upon arrival. This test evaluates basic medical knowledge common to SOF medics or medics trained to the Advanced First Responder level. Graduates of the Advanced Medical First Responder Course (or similar course) should be familiar with the knowledge needed to pass this test. Students must score 80% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test upon arrival. Military Assistance Course

Description: This course is designed to provide the training and education needed to prepare students for Military Assistance (MA) operations. The course is designed to produce adaptive thinkers, flexible leaders and dynamic problem solvers. Students completing this course will possess the skills and knowledge needed to prepare them for success in a highly complex and fluid environment. The course focuses on topics such as developing and advising a partnered force, Intelligence preparation of the operating environment, network analysis, targeting, negotiation, conflict resolution, partnered force training plan development, cross cultural communication, logistical and life support considerations, and common pitfalls in MA. Graduates of this course will possess a deeper comprehension of MA operations and how to better plan, assess, and conduct MA operations.

Prerequisites: Course is open to all NATO and Partner Nations. The course is recommended for junior to mid-grade officers and NCO's, staff personnel (up to battalion or SOTG level) and civilian personnel (interagency, law enforcement). Participation is not limited to a specific rank or duty position as the course is designed to benefit personnel of all experience levels via an interactive methodology and individual feedback. Students must possess a good working knowledge of English. For further course Pre-Requisites and Details refer to www.istc-sof.org or contact usarmy.bavaria.7atc-istc.list.istc@mail.mil

Special Operations Task Group (SOTG) Operations Planning Course

Description: This course is designed to provide students with the fundamentals of exercising Command and Control (C2) and staff planning at the Special Operations Task Group (SOTG) level. The course uses the SOTG Decision Making Process (SDMP) as the primary planning tool with additional instructions on COIN Modeling (Campaign Planning at the SOTG level), Kinetic and Non-Kinetic Targeting, Air Operations Planning to support a deliberate planning scenario. The course focuses on an introduction to the SOCC concept and the AJP 3.5, SDMP planning process, Kinetic and non-kinetic targeting, IPOE, principles of air integration and the production of an air tasking order, principles of COIN, and the set up and management of a SOTG operations center. Graduates will be able to effectively contribute to a SOTG staff and be familiar with all major functioning areas within a staff.

Prerequisites: The course is intended for officers, warrant officers and NCOs seeking the knowledge and skills needed to function on a SOTG level staff. Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. Combat Marksmanship Course (CMMS)

Description: This course is designed as an intensive shooting course designed to improve student's ability to accurately engage targets under stress and at various distances with the M4 carbine and Glock 17 pistol. The course focuses on reflexive shooting techniques, weapons transition, multiple target prioritization and engagement, shooting from parked vehicles through glass, and night time engagement. This course is designed to bring graduates to level of heightened confidence, including stress fire, barrier shooting, and while moving.

Prerequisites: Students must be able to demonstrate safe weapons handling procedures with both the M4 Carbine and the Glock 9mm pistol. Students must arrive in sound medical condition and with the completed / signed Medical Clearance form. Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. Close Quarter Battle Course (CQB)

Description: This course is designed as an intermediate level course aimed to train students on the principles of effectively operating as a single team (up to six assaulters) in an urban environment. The course is not designed to be a marksmanship course but students will receive instruction and practical application on rifle / pistol reflexive fire and stress tests. The course focuses on target engagement day/night, weapons familiarization, distribution of fire, weapons transition, turning and lateral movement, shooting from behind cover, tactical magazine change, room clearing procedures, search/control, breach procedures, CIED urban threats, red zones, halls/stairs, and exit upon command. Graduates of this course will possess an intermediate level of understanding and application with CQB planning, coordination, and execution.

Prerequisites: Students must pass a Basic Fitness Test (BFT), which is a cross-country speed march/run in BDUs and military boots (7 km in 52 minutes or less while carrying a rucksack weighing 20 kg/ 44 lbs). Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. Students are encouraged to have at least a basic knowledge and skills in combat marksmanship and CQB. Basic Sniper Course

Description: The Sniper Course is designed to provide the skill and knowledge required to deliver precision rifle fire to selected targets while using camouflage and concealment techniques. This Sniper Course primarily focuses on engaging targets up to 1200M with precision fire in a field environment during the hours of daylight and nighttime, known and unknown distance marksmanship, judging distance, observation, stalking, infiltration and exfiltration, camouflage techniques, and planning for sniper operations. This basic course has been evaluated by the Maneuver Center of Excellence and will award 11B attendees with the B4 ASI. Graduates of this course will have the skills needed to serve as a sniper or observer in an operational environment. The program emphasizes the field craft and marksmanship skills needed to support operational missions. During the course students will be organized into two-man sniper teams by the cadre.

Prerequisites: Students should be familiar with safe weapon handling procedures and possess a strong foundation in basic rifle marksmanship. Students must arrive in sound medical condition and be physically fit. Students must pass a cross country land navigation exercise carrying a rucksack weighing 20 kg/44 lbs. and navigate using a compass and 1:50,000 map. During this event students will travel approximately 10 KM and must find three out of three points within 3 hours. Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. For further course Pre- Requisites and Details refer to www.istc-sof.org or contact usarmy.bavaria.7atc-istc.list.istc@mail.mil

High Angle (HA) Sniper Course

Description: Two week course designed for trained Sniper teams, and introduces techniques on how to deliver precision fire from concealed positions in a mountain environment. Nations are highly encouraged to send complete teams consisting of 2 trained Snipers. Each Sniper team should bring their issued/organic equipment and ammunition in order to get the full value of the training. Students will be instructed on - Engage up/down-slope targets at ranges between 300 – 1800M with precision fire under combat conditions during hours of limited visibility; Engage targets down slope with an angle of up to 40 degrees at a distance of 400M; Engage targets up slope with an angle up to 40 degrees at a distance of 400M; Engage targets across valleys up to 1800M; Stalking in mountainous terrain.

Prerequisites: Students must be trained snipers who have graduated from a National or International Sniper Course prior to attending this course. Students must arrive in sound medical condition with a note signed by a medical doctor. Students are also expected to be experienced in Land Navigation using a compass and 1:50,000 scale map. Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. Urban Sniper Course

Description: This course is designed for trained sniper teams. Course teaches the skills necessary to deliver precision fire from concealment in urban environments. Nations are highly encouraged to send complete two-man sniper teams with their own organic equipment and ammunition to get the full value of the training. The course focuses on engaging with precision fire in an urban environment, engaging targets through glass, urban tactical movement, urban marksmanship day/night, stalking in urban terrain, and planning sniper missions in urban terrain. This course is designed to provide trained sniper teams the opportunity to operate in specific environments and the unique ability to apply sniper skills in varied environmental conditions.

Prerequisites: Students must be trained snipers who have graduated from a National or International Sniper Course prior to attending this course. Students must arrive in sound medical condition with a note signed by a medical doctor. Students are also expected to be experienced in Land Navigation using a compass and 1:50,000 scale map. Students must score 60% or higher on the Defense Language Institute English Language Center (DLIELC) English Comprehension Level (ECL) Test. Students must pass a mandatory shoot in test prior to beginning training at the urban facilities. This test is a safety requirement to ensure that the student, weapon and ammunition have the ability to engage targets with the precision necessary to conduct safe training. Students who fail this test will not be allowed to participate in the urban live fire events but may remain to take part in non-live fire training. Shoot-in standard: From a distance of 100M, students will fire one 5 round shot group at the designated target using their sniper weapons system; all five rounds must be within 10CM of the center of the target. Combat Marksmanship Trainer/Gunfighter Gymnasium (CMT/GfG)

It is a 40-hour instructor/operator certification course offered one-week every 6-months in Vicenza and Grafenwöhr. Class dates must be requested by written memorandum from BDE S- 3/equivalent to Vicenza or Grafenwöhr TSC Chiefs. Officers and NCO, no specific MOS, no pre-requisites.

Virtual Clearance Training System (VCTS)

It is a 4-hour instructor/operator certification course. Available upon request to each Training Support Center. Officers and NCO, Combat Engineers, no pre-requisites.

Call For Fire Trainer III (CFFT III)

It is a 40-hour instructor/operator certification course. Available upon request to each Training Support Center. Officers and NCO, Artilleryman, no specific MOS, no pre-requisites.

Deployable Range Package (DRP)

Targetry operator 8-hour training course for operation of Deployable Stationary Infantry Target (SIT) lifters, Stationary Armor Target (SAT) lifters, and other target lifters. Available upon request to each Training Support Center. Officers and NCO, no specific MOS, no pre-requisites.

Engagement Skills Trainer II (EST-II)

It is a 40-hour instructor/operator certification course. Available upon request to each Training Support Center. Officers and NCO, no specific MOS, no pre-requisites.

HMMWV Egress Assistance Trainer (HEAT)

It is an 8-hour instructor/operator certification course. Available upon request to each Training Support Center.

MRAP Egress Trainer (MET)

It is an 8-hour instructor/operator certification course. Available upon request to each Training Support Center.

GTA RSO/OIC Certification

Description: The conduct of the course takes place at the Grafenwoehr Training Area (GTA) Range Operation, Building 3015. It consists of an approximate 2 hour block of instruction covering training capabilities at GTA, a local medevac briefing, and a local area briefing on the use of the training complex followed by an hour long multiple choice test. The Certification Briefing reinforces the unit's OIC/RSO training and testing program. The course addresses GTA SOP #1, GTA SOP #2, DA Pam 385-3, AR 385-63, AER 385-63 which are necessary references that all OICs and RSOs must be familiar with to safely conduct a training event at GTA.

Prerequisites: O-5 signed memorandum confirming the completion of unit training and testing that listed personnel are qualified to perform OIC/RSO duties at GTA. Minimum grade of E- 5. US Army: Must complete Range Officer Professional Development (ROPD) 4A & 4C.

Course Capacity: 30

Duration: 3 hours

Available to Non-US personnel: Yes

MTT capable: No

ATRRS Course Number: N/A

School Code: N/A

*** GTA Range Safety Certification Briefing is for the Grafenwoehr Training Area ONLY ***

For information about training at GTA see the following resources:

GTA RFMSS: <https://rfmss.usareur.army.mil/GTA/PAGES/LOGIN.ASPX>

TAPIN: <https://tapin.eur.army.mil/tapin>

Inter-service Range Safety Course (Intermediate) Mobile Training Team

Description: This 5-day resident course is designed to prepare range control personnel, range officers, and range safety professionals for the implementation of range policies and the minimum safety standards for surface danger zones in a live fire range environment as set forth in AR 385-63/MCO 3570.1C, Range Safety and DA PAM 385-63, Range Safety. It will increase understanding of the standards and procedures for the safe firing of ammunition, demolitions, lasers, guided missiles, and rockets.

The training includes instruction in: Proper survey of existing ranges, identification of unsafe practices, development of effective countermeasures, development of proposed ranges, incorporation of required safety parameters, preparation of deviations and safety directives and construction of surface danger zones (SDZs).

The ability to read military maps is a fundamental task and preliminary instruction is recommended. Knowledge of weapon systems is preferred but not necessary.

Prerequisites: None

Course Capacity: 32

Duration: 40 Hours / 5 days

Available to Non-US personnel: Yes

MTT capable: Yes

ATRRS Course Number: N/A

School Code: N/A

US personnel: registration is done through the SRP website (proponent) and manage all seat allocations. Find the professional development tab and then register for the class and location.

Non-US personnel: coordinate through the 7th ATC Range Training Land Program manager (RTLTP) as they have direct contact with CONUS SRP personnel to allocate seats, and also need to coordinate with/through the International Military Training (IMT) for the payment/authorization.

7th Army Noncommissioned Officer Academy

Mission: Train and develop future leaders who are adaptive, disciplined and ready to lead effectively at the squad and team levels. We inspire Soldiers to be creative problem-solvers, physically fit, resilient and grounded in Army Values and the Warrior Ethos. We foster a positive environment that emphasizes life-long learning, adaptation, collaboration and critical thinking.

At the NCO Academy in Grafenwoehr, Germany, we train U.S. and Multinational Soldiers using the Basic Leader Course curriculum from the Sergeants Major Academy. Our Academy is a 22-day branch-immaterial course, which includes three modules and 169 academic hours. We offer nine cycles per year, averaging 256-324 students per course.

Basic Leader Course (BLC)

Description: The Basic Leader Course (BLC) is branch immaterial. The conduct of the course takes place in an NCO Academy non-live-in environment in accordance with the small group instruction process. It consists of minimal classroom dynamics and practical application with an intense field training environment that involves hands-on, performance-oriented training. The course graduates leave equipped with standards-based, performance-oriented, battle-focused training that supports squad level operations. It provides the Army with a leader who can visualize, describe, and execute squad level operations in varied operational environments. It is a leader course that produces a predictive, adaptive, and innovative combat leader capable of leading Soldiers in any situation. The instructional design and methods of delivery consists of face-to-face instruction, learner-centered outcomes, based on today's contemporary operational environment, and used to reinforce all small unit tactics, techniques, and procedures. The course incorporates recent lessons learned, 9 battle drills, 39 warrior tasks with the inclusion of weapons immersion, a 36-hour situational training exercise (STX), and an evaluated Land Navigation Course. The STX centers on competency, battle focused combat scenarios, and troop-leading procedures. Evaluation centers on their ability to demonstrate troop-leading procedures in current threat-based scenarios that will enhance their 360-degree assessment.

Prerequisites: US Army: Between the grade of E-4 through E-6 and must be a graduate of SSD 1. See ATRRS for additional information on priority placement.

Course Capacity: 160

Duration: 4 Weeks

Available to Non-US personnel: Yes

MTT capable: Yes

Combined Arms Language Training Center

Description: Established by the Defense Language Institute Foreign Language Center (DLIFLC) Extension Programs (EP) division to provide culturally based foreign language education, sustainment and enhancement in order to maintain a proficient and language-capable force in the European Theater. CALTC also enhances USAREUR's capabilities by providing regional expertise and cultural education deemed critical to execute ongoing and future Operations in a culturally and socially diverse environment. Located at Buildings 154/155, Rose Barracks, Vilseck with a planned campus expansion that will augment Language Resources and Language Testing interoperability.

Professional Language Prerequisites:

BASIC REFRESHER - Minimum 1+/1+ but not 2/2 level ENHANCEMENT – At least 2/2 but not 2+/2+ level
INTERMEDIATE - At least 2+/2+ to entry 3/3 level **ADVANCED** - 3/3 and higher level

Course Capacity: 8 students per classroom

Duration: 200 Hours/25 classroom days

Available to Non-US personnel: No

MTT capable: Yes

School Code: 215G, 215, 215E

DSN: 314-476-4254/4232
