

Promote Environmental Awareness

Offer environmental education

For leisure time activities and exploring nature in Germany, there are **Nature Trails** at the Wild B.O.A.R recreation center on Tower Barracks and on Hohenfels Military Community and a **Green Classroom** on Rose Barracks.

For interested groups, we conduct **guided tours** through Grafenwoehr and Hohenfels training areas.

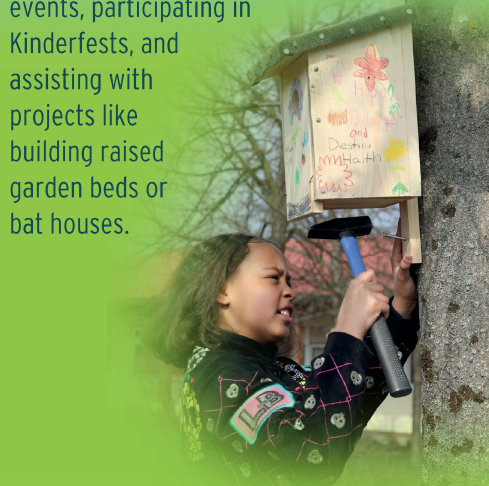

Conduct environmental training

Soldiers and Garrison employees, whose work has an impact on the environment, benefit from a comprehensive environmental training program.

Training courses or on-site assistance visits cover all environmental topics like handling hazardous materials, disposing of hazardous waste, preventing and responding to spills, handling asbestos, etc.

Annual **Earth Day** activities within all communities of USAG Bavaria range from supporting school events, participating in Kinderfests, and assisting with projects like building raised garden beds or bat houses.

Engage in social media

Check out the USAG Bavaria home page and our Facebook site to get current information on the environment and the environmental program:
